Mission Statement

The School Library Media program exists within the Medford Lakes Public Schools to broaden the scope of instruction. It gives students options for learning to pursue new knowledge that can be applied in a creative manner. As part of the total instructional program, it reflects the district’s educational philosophy within the context of each school. The school library media program reinforces the classroom learning experience and contributes to the instructional objectives for each subject and grade in alignment with the New Jersey Core Curriculum Content Standards.

The continuous school library media experience from kindergarten through eighth grade must provide enriching, maturing and stimulating experiences to foster social, emotional and intellectual development. Rewarding school library media experiences will encourage independent learning, ongoing inquiry and a life-long library habit.

Effective use of school library media centers is an ongoing, active and collaborative concern of the Medford Lakes Board of Education, administrators, teachers, school library media specialists, students and parents.

A comprehensive school library media program is essential to achieving excellence in education.
PHILOSOPHY OF THE SCHOOL LIBRARY MEDIA PROGRAM

The school library media center is a vital and integral hub of each school and as a result reflects the philosophy and goals of Medford Lakes Public Schools. In an age of information, acquiring information literacy skills and a commitment to lifelong reading and learning become paramount. In the school library media center, students develop critical thinking, problem solving, and communication skills as they use a variety of resources to meet the demands of today’s curriculum.

The school library media program does not exist in isolation. The school library media specialist works in partnership with students, teachers, administrators, board of education members, and the school community to implement the school library media program. Information literacy skills are most meaningful when learned within a subject area, within an interdisciplinary unit, or within a unit which addresses an authentic, real-life need or problem. Students must be prepared to access, evaluate, select, and apply the appropriate information to meet their educational, personal, and recreational needs. Through collaboration, the school library media program also incorporates the goals and objectives of the New Jersey Core Curriculum Content Standards (NJCCCS) and the National Information Literacy Standards for Student Learning as prepared by the American Association of School Librarians (AASL) and the Association for Educational Communications and Technology (AECT) [see page 10]. The combined vision supports the goal for educational excellence and the concept of intellectual freedom.

The principles* for learning and teaching of school library media programs are:

- **Principle 1**: The library media program is essential to learning and teaching and must be fully integrated into the curriculum to promote students’ achievement of learning goals.
- **Principle 2**: The information literacy standards for student learning are integral to the content and objectives of the school’s curriculum.
- **Principle 3**: The library media program models and promotes collaborative planning and curriculum development.
- **Principle 4**: The library media program models and promotes creative, effective, and collaborative teaching.
- **Principle 5**: Access to the full range of information resources and services through the library media program is fundamental to learning.
- **Principle 6**: The library media program encourages and engages students in reading, viewing, and listening for understanding and enjoyment.
- **Principle 7**: The library media program supports the learning of all students and other members of the learning community who have diverse learning abilities, styles, and needs.
- **Principle 8**: The library media program fosters individual and collaborative inquiry.
- **Principle 9**: The library media program integrates the uses of technology for learning and teaching.
- **Principle 10**: The library media program is an essential link to the larger learning community.

SCHEDULING OF THE SCHOOL LIBRARY MEDIA CENTER

Medford Lakes Public Schools and the New Jersey Association of School Librarians (NJASL) subscribe to the AASL Position Statement for scheduling of school library media centers as stated in the Position Statement on Flexible Scheduling*

Schools must adopt the educational philosophy that the library media program is fully integrated into the educational program. This integration strengthens the teaching/learning process so that students can develop the vital skills necessary to locate, analyze, evaluate, interpret, and communicate information and ideas. When the library media program is fully integrated into the instructional program of the school, students, teachers, and library media specialists become partners in learning. The library program is an extension of the classroom. Information skills are taught and learned within the context of the classroom curriculum. The wide range of resources, technologies, and services needed to meet students’ learning and information needs are readily available in a cost-effective manner.

The integrated library media program philosophy requires that an open schedule must be maintained. Classes cannot be scheduled in the library media center to provide teacher release or preparation time. Students and teachers must be able to come to the center throughout the day to use information sources, to read for pleasure, and to meet and work with other students and teachers.

Planning between the library media specialist and the classroom teacher, which encourages both scheduled and informal visits, is the catalyst that makes this integrated library program work. The teacher brings to the planning process a knowledge of subject content and student needs. The library media specialist contributes a broad knowledge of resources and technology, an understanding of teaching methods, and a wide range of strategies that may be employed to help students learn information skills. Cooperative planning by the teacher and library media specialist integrates information skills and materials into the classroom curriculum and results in the development of assignments that encourage open inquiry.

The responsibility for flexibly scheduled library media programs must be shared by the entire school community.

THE BOARD OF EDUCATION endorses the philosophy that the library program is an integral part of the districts’ educational program and ensures that flexible scheduling for library media centers is maintained in all buildings and at all levels.

THE DISTRICT ADMINISTRATION supports this philosophy and monitors staff assignments to ensure appropriate staffing levels so that all teachers, including the library media specialists, can fulfill their professional responsibilities.

THE PRINCIPAL creates the appropriate climate within the school by advocating the benefits of flexible scheduling to the faculty, by monitoring scheduling, by ensuring appropriate staffing levels, and by providing joint planning time for classroom teachers and library media specialists.

THE TEACHER uses resource-based instruction and views the library media program as a [sic] integral part of that instruction.

THE LIBRARY MEDIA SPECIALIST is knowledgeable about curriculum and classroom activities, and works cooperatively with the classroom teacher to integrate information skills into the curriculum.

* Reprinted with permission of the American Association of School Librarians, a division of the American Library Association.
General District Policies

Funding

Budget money is expended throughout the school year in order to acquire newly published materials as they become available. When federal money is available, additional orders are placed. Money received as gifts from other sources (such as book fair, etc.) will be expended for the library media center program under the direction of the building principal and the school library media specialist.

Damaged/Lost Materials

Borrowers shall be responsible for damaged or lost materials at current replacement cost. Each school shall have an account designated for the purpose of replacing damaged or lost materials which shall be ordered by the school library media specialist.

At the end of each school year, students are responsible for returning all materials or paying for their replacement. As per Medford Township Public School policy, students who do not return or pay for lost materials will not receive their final report card.

Inter-School Loan

School library media center materials will be available for inter-school loan within the district. All requests for materials shall be submitted in a timely manner through the school library media specialist. Any damages to borrowed equipment will be the responsibility of the borrower.

Library Records

School library circulation records that contain the names or other personally identifying details regarding the users of the library are confidential and may be disclosed only when disclosure is required for the proper operation of the library, requested by the user, or required by subpoena or court order.
Material Selection Policy

Responsibility

The school library media specialist is responsible for the evaluation and selection of material in consultation with the building principal. It is the school library media specialist’s responsibility to make all selections using professional judgment and discriminating taste. The school library media specialist must be sensitive to the needs and concerns of learners and teachers. Published reviews, recommended lists and standard bibliographic tools will be used to guide selections. Final authorization rests with the building principal under the direction of the superintendent. Suggestions for purchases are encouraged from teachers, students, and administrators.

I. Selection Criteria

These criteria help determine the selection of materials. Formats include print and non-print materials.

A. The school library media specialist should select materials having these elements of quality:
   1. Permanent or timely value
   2. Accuracy
   3. Authority
   4. Clear presentation, readability, popular appeal
   5. Format—substantial binding and paper, clear print, clean graphics

B. Factors influencing selection are:
   1. Curriculum
   2. Reading interests of students
   3. Background and maturity of students
   4. Need to develop a balanced collection
   5. Literary value
   6. Size of the budget
   7. Need for multiple copies

C. Library materials should provide a global perspective and promote diversity as a positive attribute of our society. It is important to include materials by authors and illustrators of all cultures. Materials should be free of bias and stereotypes.
II. Policies for Acquisition

A. The selection and acquisition of new library materials should be based on the needs of each school library media center as determined by the collection process and availability of funding.

B. Gift Material Policy
   1. Gifts meet the same standards of selection as those applied to school library media purchases.
   2. Gifts can be integrated into the school library media collection.
   3. Gifts may be offered to another library or institution.
   4. Gifts may be discarded at the discretion of the school library media specialist.

III. Weeding Criteria

A. Materials and equipment within existing collections are monitored and examined continuously in order to replace worn items and to withdraw out of date and inappropriate items. The process of weeding is key to assessing the collection. It helps keep collections relevant, accurate and useful and it facilitates effective use of space in the school library media center.

B. Factors influencing the decision to withdraw material include:
   1. Age
   2. Condition
   3. Accuracy of information
   4. Circulation history
   5. Suitability to student population
   6. Curricular needs
   7. Bias or stereotyping
   8. Unneeded duplicate copies
Challenged Material Policy and Procedure

Policy
It is the intent of the school library media center to address the rights of all patrons in regard to challenged materials. Any concerns about challenged materials will be addressed with consideration from the First Amendment of the United States Bill of Rights, American Library Association's Bill of Rights, Medford Lakes School District policies, American Library Association’s Freedom to Read statement as well as local, state and federal laws. A set procedure will be followed when addressing challenged materials.

1. Procedures to be Followed for Challenged Materials (See Policy and Regulation 9130 Public Complaints and Grievances.)
   Any material which is found to be objectionable by a member of the community will not be immediately pulled from the shelves. The proper procedure for reconsideration of materials must be followed:
   - The complainant speaks with the school library media specialist concerning the material in question
   - If the complaint cannot be resolved after speaking with the school library media specialist, the complainant fills out a request for reconsideration form and returns it to the school library media specialist. (See Appendix F, page 33)
   - The questionable material complaint reconsideration form will be addressed by the school library media specialist who will make a recommendation.
   - If the complainant wishes to continue their request for reconsideration of resource materials after reviewing the school library media specialist's recommendation, the complainant will complete the tear-off section of the Reconsideration of Materials form (See Appendix G, page 34) and return it to the school library media specialist who will forward it to the Principal.
   - A special review committee for challenged resource materials will be formed to review the request and make a recommendation which will be forwarded to the Superintendent. (See Regulation 9130, section E3 for committee procedures.)
   - The Superintendent will review the decision. The Superintendent will consider making a final decision on the complaint or defer the decision directly to the school board.

2. Special Review Committee for Challenged Materials
   a. If the material exists at the K-5 level, the committee shall consist of:
      - at least two teachers from the appropriate grade level
      - a minimum of one school library media specialist
      - one elementary Principal
      - the director of curriculum, who shall act as chairperson
      - one representative from the HSA, chosen by the HSA and the Superintendent of Schools, ex officio.
   b. Grade 6-8 level will include:
      - at least one teaching staff member
      - school library media specialist
      - Principal
      - one representative from the HSA, chosen by the HSA and the Superintendent of Schools, ex officio and
      - the director of curriculum, who shall serve as the chairperson
   c. Other K-8 committee members that may be considered:
      - other staff members whose participation will strengthen the committee, such as a guidance counselor
      - an assistant principal
      - a Board of Education member
- additional administrators/supervisors
- a student representative
PHILOSOPHY OF INSTRUCTION

The school library media center specialist collaborates with the faculty to integrate information literacy skills with content area instruction and learning activities across the pre-K through eighth grade curriculum by providing:

- equitable access to information
- flexible scheduling that enables all students to have access to the school library media center, its staff and resources
- resources and sequential instruction necessary for students to become independent, lifelong learners, as well as discerning readers, viewers and listeners
- opportunities for an active collaboration and partnership with teachers and administrators in working toward shared instructional goals
- resources that extend beyond the confines of a textbook
- technology for information retrieval
- opportunities for ongoing and meaningful assessment of student learning
- experiences that address the changing and evolving information environment
Collaboration

Collaboration is at the heart of the Medford Lakes Public School District’s library media program. Collaboration is defined as “when two or more people work together to create or achieve the same thing” (Cambridge University Press, 2003). Medford Township Public School District believes that classrooms, teams, grade levels and specialists do not exist in isolation. The physical spaces of the school become united during collaborative projects. Collaborative lessons and projects engage our students while meeting the New Jersey Core Curriculum Content Standards and Information Literacy Standards.

Integrated lessons make learning and research authentic and meaningful for students in the 21st century. Collaborative learning experiences embed information literacy skills within authentic learning situations so that students can independently fulfill their personal needs for information. Ultimately, students become lifelong learners in the information age.

Steps for Collaboration

Step 1—meet with all collaborative teaching partners to discuss possible topics

Step 2—develop a standards based project (NJCCCS and ILS)

Step 3—use a collaborative planning outline (see Appendix H, page 35) when determining learning activities, materials, resources and instructional roles

Step 4—determine a timeline for the collaborative project

Step 5—execute the collaborative project

Step 6—assess student outcomes

Step 7—share success with the school community

Step 8—evaluate and reflect on the collaborative process
SCHOOL LIBRARY MEDIA PROGRAM GOALS*

The student centered school library media program focuses on the development of a community of learners. A creative and energetic program includes the following goals:

- To provide intellectual access to information through learning activities that are integrated into the curriculum and that help all students achieve information literacy by developing effective strategies for selecting, retrieving, analyzing, evaluating, synthesizing, creating, and communicating information in all formats and in all content areas of the curriculum.

- To provide a physical access to information through
  a. a carefully selected and systematically organized local collection of diverse learning resources that represent a wide range of subjects, levels of difficulty, and formats;

  b. a systematic procedure for acquiring information and materials from outside the school library media center and the school through such mechanisms as electronic networks, interlibrary loan, and cooperative agreements with other information agencies; and instruction in using a range of equipment for accessing local and remote information in any format.

- To provide learning experiences that encourage students and others to become discriminating consumers and skilled creators of information through comprehensive instruction related to the full range of communications media and technology.

- To provide leadership, collaboration, and assistance to teachers and others in applying principles of instructional design to the use of instructional and information technology for learning.

- To provide resources and activities that contribute to lifelong learning while accommodating a wide range of differences in teaching and learning styles, methods, interests, and capacities.

- To provide a program that functions as the information center of the school, both through offering a locus for integrated and interdisciplinary learning activities within the school and through offering access to a full range of information for learning beyond this locus.

- To provide resources and activities for learning that represent a diversity of experiences, opinions, and social and cultural perspectives and to support the concept that intellectual freedom and access to information are prerequisite to effective and responsible citizenship in a democracy.

- To provide resources and activities for learning that represent a diversity of experiences, opinions, and social and cultural perspectives.

- To support the concepts that intellectual freedom and access to information are prerequisites to effective and responsible citizenship in a democracy.
Information Literacy Standards for Student Learning*
and the Revised (2002-2004)
New Jersey Core Curriculum Content Standards

**Information Literacy**

**Standard 1: Accesses information efficiently and effectively**
- Recognizes the need for information
- Recognizes that accurate and comprehensive information is the basis for intelligent decision making
- Formulates questions based on information needs
- Identifies a variety of potential sources of information
- Develops and uses successful strategies for locating information
- Accessing information is a very basic skill and all standards listed under the subsequent Information Literacy Standards require the use of Information Literacy Standard 1.

**Standard 2: Evaluates information critically and competently**
- Determines accuracy, relevance, and comprehensiveness
- Distinguishes among fact, point of view and opinion
- Identifies inaccurate and misleading information
- Selects information appropriate to the problem or question at hand

**Standard 3: Uses information effectively and creatively**
- Organizes information for practical application
- Integrates new information into one’s own knowledge
- Applies information in critical thinking and problem solving
- Produces and communicates information and ideas in appropriate formats

**Independent Learning**

**Standard 4: Pursues information related to personal interests**
- Seeks information related to various dimensions of personal well-being, such as career interests, community involvement, health matters, and recreational pursuits
- Designs, develops, and evaluates information products and solutions related to personal interests

**Standard 5: Appreciates and enjoys literature and other creative expressions of information**
- Is a competent and self motivated reader
- Derives meaning from information presented creatively in a variety of formats
- Develops creative products in a variety of formats

**Standard 6: Strives for excellence in information seeking and knowledge generation**
- Assesses the quality of the process and products of personal information seeking
- Devises strategies for revising, improving, and updating self-generated knowledge

**Social Responsibility**

**Standard 7: Recognize the importance of information to a democratic society**
- Seeks information from diverse sources, contexts, disciplines, and cultures
- Respects the principle of equitable access to information

**Standard 8: Practice ethical behavior in regard to information and information technology**
- Respects the principles of intellectual freedom
- Respects intellectual property rights
- Uses information technology responsibly

**Standard 9: Participates effectively in groups to pursue and generate information**
- Shares knowledge and information with others
- Respects others’ ideas and backgrounds and acknowledges their contributions
- Collaborates with others, both in person and through technologies, to identify information problems and to seek their solutions

**SCOPE AND SEQUENCE**  
**COURSE OUTLINE/STUDENT OBJECTIVES**

### Relationship to National and State Standards

This curriculum is designed for grades pre-k through 8 and meets the New Jersey Core Curriculum Content Standards and the Information Literacy Standards for Student Learning as prepared by the American Association of School Librarians and the Association for Educational Communications and Technology. These standards can be mastered in the school library media center with collaboration between the teacher and the school library media specialist.

* Medford Township Public Schools will use Modern Language Association (MLA) bibliographic citations for continuity within the district and with the Lenape Regional High School District.
Request Form for Reconsideration of School Library Media Center Materials

Initiated by: ________________________________________________________________
Telephone: __________________________ Address: __________________________________

Representing:
Self: ____ Organization or group: _____________________________________________

School: Neeta □ Nokomis □

Material Questioned
Print: Author _________________________ Title _________________________________
Non-Print: Type _________________________ Title _______________________________

Please respond to the following questions. If sufficient space is not provided, please use the back of this form.

1. Have you seen or read this material in its entirety?

2. To what do you object? Please cite specific passages, pages, etc.

3. What do you believe is the main idea or theme of this material?

4. What do you feel might result from use of this material?

5. What reviews of this material have you read?

6. For what other age group might this material be suitable?

7. What is your understanding of the teacher’s purpose in using this work?

8. What action do you recommend that the school take on this material?

9. In its place, what other material do you recommend that would provide adequate information on the subject?

Date ______________ Signature ________________________________________________
Challenged Material Verification Form

Date:

Dear ______________________

Your concern over the use of __________________________________ in our school library media center is acknowledged. The school library media center has developed procedures for selecting materials but realizes that not everyone will agree with every selection made.

To help you understand the selection process, I am enclosing a copy of the School Library Media Center Selection Policy and a copy of the Challenged Materials Policy and Procedures.

If you are still concerned after you review the enclosed material, please sign and date the form below and return it to me. Your request will be addressed by the Reconsideration Committee.

If I have not heard from you within ten working days of the above date, this will indicate that you no longer wish to pursue a reconsideration of the material.

Sincerely,

School Library Media Specialist
